## Performance Comments

### Communication Comments

Strong communication skills overall

### Collaboration Comments

Apexa actively contributes to establishing a team-based, collaborative working environment with her peers. She is willing to lend a hand where needed, offers team members help regardless of the task and is open to listening to others' opinions.

### Professionalism Comments

Apexa conducts herself in a professional manner.

### Technical Knowledge & Expertise Comments

Apexa's technical knowledge is expanding as she gains more experience. On the NYULH Suffolk project, she has served as Job Captain. As she progresses toward becoming a Project Architect, it would be beneficial for her to seek opportunities that keep her engaged with all aspects of a project's technical development.

### Workflow Implementation, Management, Execution Comments

I encourage Apexa to continue to take on more responsibility and support project leadership by actively establishing priorities, identifying issues, and defining tasks for herself and the team to keep the project moving forward.

**Additional Data****Software & Tools Feedback**

No specific items to note at this time.

**Specific Performance Examples**

Apexa was asked to jump in to help prepare for an important interior presentation for the NYULH Suffolk project. Many of her team members were out on PTO so she needed to shift gears (Revit to Rhino) diving into design studies, coordination with our partner design firm and organizing the majority of the presentation material. She was asked to step outside of her comfort zone, and she delivered - the presentation turned out great.
